Subject: Help problems :(
Posted by Danix on Fri, 05 May 2006 10:16:58 GMT

oke here i start;

i was in the mood of reinstalling renegade again, but now some servers are renguard protected and people are abusing
!renforce....

so i want to install renguard and that i can play normal for once..

so i install renguard, but each time when im in the progess, a error comes with the note;
"CRC-Error.

i already followed the instruction of the renguard site, reinstalled renegade so many times...
downloaded renguard from different sites and formatted mine computer.

please if some1 knows the answer to solve this problem i would be gladfull..
