They will rethink that, those are two very important features that they can't afford to charge \$127.09 more for.

I highly doubt they can afford to charge \$634.17 for just the base unit. We will just end up being screwed on the games end paying \$70-\$80 on games.

What do you mean 634 dollars? By \$/Euros I meant that the 60GB was \$600 in the U.S. and 600 Euros in Europe, same thing applies to the 20GB version.
