I'm sure there has already been a post about this, but I don't have the time to look it up right now sorry

Well I start Renegade as usual and all the sudden I get an error saying that my always.dbs is corrupted (Screen Shot Below) I Tried deleting it then reinstalling from the disk but the same error occurred. Any info on how to fix this would be appreciated. Thanks.

The screenshot shows the RenGuard 1.03 software interface. At the top, there's a banner for 'COMMAND & CONQUER: RENEGADE' with the tagline 'Experience C&C from a whole new perspective.' Below the banner, a 'Community MOTD' box lists links: 'Community MOTD', 'Server List', 'Beginner's Guide', 'Help', 'About RenGuard', 'RenGuard.com', and 'Support Chat'. To the right, a 'Top 5 Servers for GameSpy and Westwood Online' table is displayed, showing player counts for various servers. Below the table, a 'Current News' section contains a log of messages from the server. At the bottom, there are buttons for 'Renegade', 'Options', and 'Quit', and a status bar indicating 'RenGuard 1.03 - 662 user(s) on 82 server(s)'.
