Oblivion165 wrote on Mon, 03 July 2006 00:04Seagate...hehe have a nice 2 months with that harddrive.

I've never had any problem with my Seagate harddrives. Just becuase you have one die doesn't mean the whole product is bad.

BTW My new laptop:

(Motherboard) MICRO-STAR INT'L CO.,LTD. MS-1039, version 0391
(RAM module 1) 1GB, form factor: DIMM (RAM module 2) 1GB, form factor: DIMM (2gb)
(HD drives) 111GB total space, 93.1GB(83.3%) free
(Drive 1) FUJITSU MHV2120AH, 111.79GB size, 1 partition(s), IDE interface
(Video controller 1) ATI Mobility Radeon X1600 (Processor: ATI Mobility Radeon X1600 (0x71C5)), 256MB, 1280x800x32, 60Hz, driver version: 6.14.10.6618
(Network adapters) 1394 Net Adapter, RAS Async Adapter, WAN Miniport (L2TP), WAN Miniport (PPTP), WAN Miniport (PPPOE), Direct Parallel, WAN Miniport (IP), Packet Scheduler Miniport, 802.11g MiniPCI Wireless Network Adapter, Packet Scheduler Miniport, Realtek RTL8168/8111 PCI-E Gigabit Ethernet NIC, Packet Scheduler Miniport, Microsoft TV/Video Connection, Hamachi Network Interface
(Operating system) Microsoft Windows XP Professional (SP2), version 5.1.2600 (48 processes running, 1.45GB free RAM, installed 6d 11h 37m 37s ago, 19h 13m 10s uptime, 2d 2h 16m 47s uptime record)
