Yeah - a bigger case is the way to go - that way you have room to spare to add in all the mod items...

The fingerprint scanner is useful in that i can use it to log on to websites/the rig itself - and as pointed out - encrypt files (although i use PGP 8.0). (just a geek toy)

I have added some temp probes for the case and swapped out the flat cables with round ones.

But - i've been busy putting my stuff back onto this new rig - and i still can't believe how fast it is. Renegade re-installed in record time ... didn't even get pass the GDI soldier....

So now this weekend - i will be hard at work on the map pack - and maybe playing a little Renegade....
