it's not out. It's basically vaporware, unfortunately. It's a great game and I wish it came out, but it's been around for a long time and the website barely has any news at all. I already gave up on it not too long ago. They pushed the release date so many times that it's to the point where they don't even say the release date anymore. They have very old screenshots on the websites and never show any more evidence of progress. They also stated that they were rehauling the game not too long ago, but have shown NO new media. The game pretty much lost all of its fans too. I doubt it'll ever come out.

just so you know, this should be in general discussion with "OT:" in front of the title. A moderator will most likely move this.

EDIT: I noticed that just recently they posted another release date. according to them they will release it the first quarter of 2007. I still don't expect it to happen though.
