Jeep Rubi wrote on Thu, 03 August 2006 17:27I would like to know how to skin so i can star skinning my own models. If anyone can offer any help or link me to some good tutorials i would greatly appreciate that.

BTW: Im using Photopaint 11 and Photoshop 5.0

Get Photoshop 7 or above aswell (CS preferably) you get many more features, looks nicer too.

To let you know, skinning is where you link vertices to a bone, you mean texturing.
