Quote:ALLOW [<Nickname>|<Id>] - Remove user channel ban from this server (WOL mode only).
BAN [<Nickname>|<Id>] - Permanently ban a user from this server(GameSpy & WOL mode only).

Or if you're using BR, enter a game and type "!allow playername".

I found these commands don't work properly 90% of the time. If the person is on your FDS ban list, the best thing to do is delete the name manually. Then restart the server.
