Crimson wrote on Sat, 02 September 2006 21:26I forgot to mention -- Every other hour, on the hour, when the forum hangs, it's because the database is locked for backups. So if we are hacked, at the worst case scenario we lose less than 2 hours worth of posts. If you remember, back when we were on phpBB, we were hacked and all posts deleted, but my backups saved the day.

No problem.

^ That's what happened last time phpBB showed its ugly face 'round here.

Go FUDforum go!
