No it doesn't, XWIS changed their system months ago to require either a REAL FDS key or your games serial code.

Theboom69 wrote on Thu, 14 September 2006 18:29P.S. Hey nightma can you make a bot that will run a RenAlert APB Server?

BRenBot 1.43 is mostly compatable with APB, and I intend to contact the APB team and find out exactly what the differences are between the servers to make it 100% compatable.

Oh, and there is an FDS tut in the topic underneath this one ->
