Do I need to quote the entire topic where you explain what SMAC is and how to spoof it?

I don't care if people can find out ip's and ports with packet sniffer cause 99 % of the cheaters doesn't know what a packet sniffer is. You just make it so easy that every retard that visits the site can do it and for exemple join without a nickname so people can't kick him or join with a moderators nick so they can ban anyone inside.

I assume you want RG 1.04 to be released asap as we all do. Then maybe go ahead and offer to help BHS?
