Quote:Srry but it is ture anyone can tell you that EA is fucking runing out of idea's.

The story line's of C&C are the following.

GDI v nod

Allie's v Sov's

I see no China v USA in that do you?

There for make's me think they are runing out of idea's and trying to update C&C witch wil never happen.

If you ask me i think they should stick with nod GDI Sov's and Allie's befor they dig them self in a hole they can't get out of.

Iam still w8ing for some one to sou the hell outa them for stealing a name that has nothing to do with the REAL C&C.

All this is gonna do is star a war with us and China.

If you wana keep C&C alive keep GDI v NOD and Allie's v Sov's.

Dont not try to fucking steal a name and put some diff kinda shit in the game.

That is my point.

Key word in that, Quote:if you ask me

Which no one did, and wtf you talking about anyway. War with us and China. Wake up kid, its a game. Fictional, assuming you know what that means, theres no GDI or NOD in real life man. Shut down your computer, get some sleep and come back in a few days when the acid you are using wears off.
