ok thanks, i know brenbot can work but i don't know well how to configure it!

my problem:

- 1)i have registered a channel and a nick for my bot, it doesn't connect to IRC
- 2) i have remote admin acces, with telnet. but when i am ingame i can type !help !showmods and other but no command work ! i think the bot can't read what i type ingame !
- 3) if i want to kick anyone, i must go on the desk and kick he via telnet!

i join my brenbot.cfg and server.ini!

and 3 screen on my FTP (with filezilla)

thanks by advance for help!
