Matix wrote on Mon, 02 October 2006 01:45, and LR01 is saying he should rename game2.exe to server.dat, patch that, and renme it back. Personally, I think patching your game2.exe that is suppost to patch a server.dat will fuck up your client, badly.

Actually, i said that, LR01 just quoted me.

And i do know he wants to run a clientside server, but without running an FDS this is his best bet.
