Mate, I think your cat posed itself on your caps lock button. You might want to check on that.

If you want to do it as a player, the easiest way to find out is by doing "!sounds" when in-game.

If you want to do it as server owner on your server, it's not that easy.

To be honnest: I find those sounds quite annoying. Sure, it's funny the first 10 times you hear them. After that, it gets plain annoying and deconcentrates me.
