i think there is one like that. I'm not at my PC now so the best i can do is this. in LE go to the bottom of the script list and look at the last 5-10 scripts, i think the one you want is there...

when i get home if i dont forget i'll see if i can find the script you want.

if not you can always create a DavesArrow

Attach "RMV_Triger_Zone" or "RMV_Triger_Entered??"(ID = DavesArrow ID)to your zone

Attach "JFW_Console_Input_On_Custom" to the DavesArrow
