You would be playing a lot longer to get better by playing against bots.

Here are some questions I have though:

1. How many kills do you usually get on average in a game online?
  2. How many deaths do you usually get on average in a game online?
  3. What size server do you play on?
  4. Compared to the size of the server and the amount of people in that server on average, what number are you usually on average in the score list?
  5. Do you have excessive lag? Little lag?
  6. How long have you been playing?
  7. How many hours a day do you usually play?
