Ok, I moved Renegade Manually to another Hard Drive (Ok, stupid thing to do, but I was too lazy to find my disks) After Renguard started to fowl up I un-installed and Reinstalled. But every time I try to boot up Ren I get this error box.

I did take a Few steps to correct the problem but to no success

*Reinstalled Renegade To the new Hard-drive
*Deleted Renguard from the Windows Registry ((Recommended by Uncle))
*Reinstalled of Renguard to new drive

I'm kind of Out of ideas at this point.

System Specs:

Windows XP with SP pack 2 I believe
Intel M chip with 512 Ram
140 gigs of free space left

Um.. I guess thats all I can tell about that..
