ok i did not run the mirc so i did not set up my nickname for the noobstories server but i have done that now and it worked. Sry bout that. I set up my bot name and everything in my brenbot configuration file and i ran brenbot. This is what i got after i got server welcome message

Identifying with Nickserv...  
Joining IRC Channel...  
IRC: Natester :+wx  
Debug: Looking for c:\Westwood\renegadeFDS\Server\  
Stopped gamelog!

IS this what i am supposed to get? I ran my server just after it verified my nickname then it came up with the Debug.....and whatnot
