I have this problem too.
since a few days, i get a blank screen, and it doesn't respond.
I use a router too, but it isn't wireless.
But I don't think that it is the router. I've changed nothing with my router. I've tried to un install
renguard, and install it again, but i only get that blank window again.
it isn't my firewall, I've set all my defenses off, and still, got a blank window, exactly the same as
nopol has...
