I have this problem too.

since a few days, i get a blank screen, and it doesn't respond.

I use a router too, but it isn't wireless.

But I don't think that it is the router. I've changed nothing with my router. I've tried to un install renguard, and install it again, but i only get that blank window again.

it isn't my firewall, I've set all my defenses off, and still, got a blank window, exactly the same as nopol has...
