Nice showing us all how you hax man - I bet you just went round one shot killing all those infantry with that ranjet.
You only played 15 years? You are too noobie to understand that ramjet one shot kill is not a hack, its skill, you just need to hit any place on the body except head. I've been playing for 16 years nobby. I used to prang n00bz in the GDI Power Planets on the renegade internets. (been pranging on teh internets for 4 months now, i used to prang botz in singel player power planets)

I had more mvps than you could imagine, one time it was 1v1, the guy i was pranging was in teh AGT in field, i had stank, it was 5 minnutes in game and he still have soldier and standing @ pt, LOL NUB, so i give him hs from 20 meter, he died, he spawn back in agt, guess what happened, another hs from 20 meter.

He never came out of buildings the whole game, too scurrd zlolz! LOL I had mvp that game, and guezz what most kills (8 kills in 60 minut3s omG), and only had 5 deaths, stupid harvy got me everytime i got out of tank!
