Justin Pereira (JRP) needs to be added to the list of credits if you are still using his things, he reminded me to tell you. The overall layout looks great, should be good when it's done. The HTML version of Stonerooks FAQ that I have formatted and updated a little is at http://generalhavoc.port5.com/tutorials/faq.htm (link is redirect to actual page) if you wanted to include it or link to the page. It is under 250kb as HTML but probably less when the whole thing is zipped as it is plain test mainly. Excellent!

EDIT: sorry about the mistake, my friend has almost the exact same name as you, i got a little confused
