Crimson wrote on Mon, 26 February 2007 22:42I'm getting my full retail version free from EA. I just hope I can get it from EA Link instead of waiting for them to ship it to us. I'm about to hop into the demo and check it out now. I hope it will play well... EA gave all the Community Summit attendees free high-end video cards from nVidia so we'd be able to enjoy it. I'm not sure my old Ti4800SE would have handled this well.

>Ti4200 worked fine here, it's just that you won't be able to put all the candy on.

Also, I have a problem. It randomly crashes during Skirmish and immediatly crashes when I start a mission

Can anyone help with this one?[/quote]

Does it just crash to desktop? or as in PC crash? If so try to increase your virtual paging memmory. Also post your system info.
