I'm trying to install Renegade on Windows 2000 and it's crashing every time I open setup.exe, either through the launcher or through Windows Explorer/My Computer.
I've got a TFD disc but I don't know if I'll be able to play over LAN if I only have one apparently working disc - plus since my 'Old' (Win 2000) PC doesn't have a DVD drive I have to install over the network which takes AAAGGEEESSSS and doesn't solve the problem anyway.

So yeah, has anyone had a similar problem and found a fix?
