Last week n today i downloaded RenGuard twice, the 1st n second time i can't install them cuz my comp won't let me install it! After I downloaded RenGuard (I tried downloading from all type of sites). Then when install shield comes up i chose English language, the install box comes up-ONLY for 2 secs! then automatically gone/exit itself. I never got to install my RenGuard, n now i can't play on n00bstories server anymore. Help, how can i fix this problem that my computer won't let me install RenGuard? The Install program just keep exit-ing itself!
