something wierd while i was testing out the bans on Sbot. i joined my server, banned myself. and found i could not get back in. ok, thats fine and working. except it wasn't the Sbot not letting me back in. it was something else. i was "allow roshambo"ing but i was to no use. i found that other people except me could join my own server. i changed my ip address and nick and vio-la i was back in. how can i get back in with me regular nick?
