Hello you all,
I live in Turkey and I am playing Renegade for several months. I have a urgent question which is that I am not able to connect to Westwood Online, every time I try to connect, I get a message of "Login failed! Unable to connect to server! Unable to connect to Westwood Online!" since March 21, 2007. Is there a general problem in the servers or is it about the ISS of my country? If you can help me, I will be extremely happy. Have a nice day...The message that comes out is this:
