that is WHAT westwood detected my speed at i have been playing a while and everyonce in a while it detects me at 56k even if i go in and have it re detect it ays i am 56k if i set it to 1m/1m i still get a VERY HIGH ping
example if i entered the game that speed is (44) i will have a ping of 600-1000) so i can't play till WESTWOOD says i am 1m/1m
