Quote:Even if it was like Earth, we can never go there...let alone settle there. We don't have the spacecrafts and we certainly will die trying to reach it. Humans can stay in space for a certain time only...staying more will result in radiation and muscle loss and a whole crapload of other stuff.

Oh, I wouldn't say 'never.' Probably not in the next 200 years at least. In the 1800s, nobody believed that heavier-than-air flight was possible, so they would have said "we'll never fly" or something like that. And now, just over 100 years after the first plane flight, we have planes that can seat over 800 people!(Airbus A380) We also went to the moon like 66 years after the first flight. (Unless you're a conspiracy theorist.) My point is, to say 'never' is unrealistic. Or something like that.
