Subject: .mix
Posted by BlueThen on Thu, 17 May 2007 02:49:17 GMT

:/ I can't seem to save .mix's. I usually use .pkgs because I thought having them .mix's are useless. But I started trying to modify mission maps and have them work for multiplayer. I added C&C_ at the beginning, and used JonWil's(I think) version of LE and saved it as .mix in my DATA folder. I restarted ren, and loaded the map... All I saw was blue hell. I fell and died over and over again. How do I fixed this?

(BTW, I tried saving it as .mix the other way, but my le freezes and crashes everytime)
