\$500 just about even dollars later I finally have a projector home entertainment system, the bulb had 275/2000 hours of life and I was lucky to fine a extra bulb for 100 bucks on ebay! (\$400 retail). 100 inch diag screen, it can go so much bigger but my little apartment cant handle a bigger screen.

I'm going to Wii the crap out of this thing.

Sorry about the blur, my camera is having a hard time with the light exposure.
