Ahh, boredom - such a wonderful thing.

Well, i was fed up and bored for 10 minutes so i made the program...

<http://www.thecodesmith.com/download/CastleHelper.zip>

The screenshot pretty much explains it all...

I suggest getting at least 200 wizards before using this, so you don't run out of wizard power as it will kill everything the mouse passes over.

Just move your mouse over part of the flash game, and hold ctrl/alt or space and bye bye enemies... enjoy.
