Why is it that Brits and Americans don't know as many languages as other countries such as Germany? We are we too lazy? I don't want to offend anyone with this, but a lot of people who sign up to these forums are forced to speak English or they get little help. Pretty much the same with many forums. English is supposed to be a hard language to learn, so why are people from other countries forced to learn it? I also find that people from Germany and some other countries other than America and England actully even type properly, while Americans and Brits don't even type legiable.

Yes, i sterotyped this to America and England. Please don't take offence. I don't mean all of America and England.
