```
function printf(...)  
    io.write(string.format(unpack(arg)))  
end  
function InputConsole(...)  
    Console_Input(string.format(unpack(arg)))  
end
```

Object = 0

```
function OnChat(pID, Type, Message)  
if Message == "!build turret" then  
local pos = Get_Position(Get_GameObj(pID))  
if Get_Team(pID) == 0 then  
    if Get_Money(pID) < 600 then  
        InputConsole("ppage %d You need 600 credits", pID)  
    else  
        turret = Create_Object("Nod_Turret_MP_Improved", pos)  
        if turret == nil then  
            InputConsole("ppage %d Error creating turret", pID)  
        else  
            Disable_Physical_Collisions(turret)  
            Set_Money(pID, Get_Money(pID)-600)  
        end  
    end  
else  
    InputConsole("ppage %d You need to be on Nod", pID)  
end  
end  
if Message == "!build tower" then  
local pos = Get_Position(Get_GameObj(pID))  
if Get_Team(pID) == 1 then  
    if Get_Money(pID) < 600 then  
        InputConsole("ppage %d You need 600 credits", pID)  
    else  
        pos.SetZ(pos.GetZ()+8)  
        turret = Create_Object("GDI_Guard_Tower", pos)
```

```
if turret == nil then
    InputConsole("ppage %d Error creating tower", pID)
else
    Disable_Physical_Collisions(turret)
    Set_Money(pID, Get_Money(pID)-600)
end
end
else
    InputConsole("ppage %d You need to be on GDI", pID)
end
end

end

function OnPlayerJoin(pID, Nick)
end

function OnPlayerLeave(pID)
end

function OnHostMessage(ID, Type, Message)
end

function OnLevelLoaded()
end

function OnLevelEnded()
end

function OnConsoleOutput(Message)

function OnDDEReceived(Message)
end

function OnObjectCreate(Object)

```
function printf(...)

function OnChat(pID, Type, Message)
    if Message == "!buy arty" then
