Time to bring this back to life.

So I ran that little appy you created and now BRenBot looks like what is in the attached screenshot.

Also I have noticed of late that our warnings plugin never loads. Did this plugin become no longer supported? Our clan eally likes the language filter and the auto_kb list function, we would like to see this feature re-instated if at all possible.

I made sure the plugin was the latest version and that it is turned on. If there is anywhere else to check on these plugins please let me know.
