It's good, but it's not worth $40.

Also, thanks for the theme, it rules.
I honestly do, considering I use the PC daily and it makes using dual monitors so much easier than Multimon or nothing else I worked it out on a cost-per-day and decided it was well worth the cost.

Plus I can install it on my laptop + desktop. It makes running my laptop in dual-screen at uni really easy. (You either buy a license for users or systems, whichever is less).
