Reborn wrote on Thu, 19 July 2007 11:38Erm, I downloaded it and it was fine. It was fieldTS. Not glacier.

Perhaps all th work you have been doing on glacier has frazzled your brain?

Maybe.

Well, maybe it is me then, But I think I did everything right. o.o

I added the map to my presets, its pointed to the right .w3d file to make, when its made, its glacier_flying. o.O
