Right. So I installed Renegade using one of my three valid serials (I own every one legally and none of them have been banned from XWIS)

Xwis gives this error:

So I use the Renegade serial tool to swap to another of my valid serials, same thing. Wtf?

The only unusual thing about this Renegade installation is that the install of windows has a system root of G:\ (rather than C:\ , this is my second copy of windows)

Using XP home SP2. Ideas?

Your serial number is invalid. You should reinstall the game using a valid unshare serial.
