c0vert7 wrote on Thu, 02 August 2007 15:38LOL so spoony what is your real life like? BTW you forgot to add that you are always playing renegade too... Surely you dont have a wife or girlfriend or friends. Unless your wife or girlfriend plays renegade with you and your friends play renegade with you.

except for the tiny little fact that I don't really play renegade all that much, but you've never let facts get in the way of a flamewar before and damned if you'll start now, right?

c0vert7 wrote on Thu, 02 August 2007 15:38BTW I no one in my whole town knows I play any computer games.

I expect nobody in your town knows you at all...

c0vert7 wrote on Thu, 02 August 2007 15:38but of course when I say u were pissed about killig your ref you went into denial and overload swearing and capslocking.. I must have hit a nerve, otherwise you wouldnt have cared.

Gj, take everything I said about you and turn it upside down. What you fail to realise is when I said it about you, it was actually true... when you say it, it's a feeble attempt to insult someone made out of anger. Like when you fabricated quotes from me to put in your sig, because you couldn't think of anything that's actually real, remember that little gem?

c0vert7 wrote on Thu, 02 August 2007 15:38You say I get pissed over a computer game, why do you get so pissed if someone cheats than?

Retarded question, because I didn't say anything about you cheating until YOU started a thread flaming ME out of anger... good job humiliating yourself yet again.

c0vert7 wrote on Thu, 02 August 2007 15:38U should read some of spoonys replys at n00bstories forums ull see where it came from. He flames just about every member there. Than he fell back on they started it!

in your case, you indisputably start it... lie all you want. But all I've done is call you a loser and a geek... you're the one who CHEATS, geek.

Go make some friends in the real world instead of having a nervous breakdown just because someone called you a geek on the internet... that's all this is. The internet.
