Goztow wrote on Mon, 13 August 2007 01:43Maybe he means an auto installer which installs most important FDS fixes?

Blazer was planning to make something like that but I don't think he got to it.

Well I kinda meant that in a way one that installs a server.dat with some of the fixes and maybe fixes the problem where people get kicked off the fds and crash to desktop (happens to me alot on some ppls fdses).
