I have been running Vista Ultimate 64 bit for a while, and if your machine is up to specs, you can really have an enjoyable time on the PC.

I love the new look, but I am a visual person, I liked XP when it came out, because it has a new look to it, and I like the Aero stuff now.

I spend a good portion of my life staring at a monitor, don't blame me for wanting it to look attractive and mildly colorful.
