AND HALO2PAC to the rescue Dun dun da da!!!!

ok mr noobie halo is here to help .. sure i suck at some things... dont say life u geeks.....

-----

ok heres what u need:

1 of theses files depends on ur server.....
 http://black-cell.net/downloads/index.php?act=category&id=6

http://black-cell.net/downloads/index.php?act=view&id=25aka the plugin for making commands/ whatever attachments to whatever

3. an edited vesion of the lua file .. not the dll...

(attached below = luaplugin.lua)

4. a server .... a dedicated 1.....

http://www.fileshack.com/file.x?fid=700

serial = 0669000000000-ad more zeros till u hear beep. (if i put bad serial then plz correct me) with the newest version of nightregualtor http://www.nightregulator.co.uk/ssaow... from http://www.nightregulator.co.uk/

- 5. install server ...
- 6. configure server \*.ini\* files
- 7. install nightregulator and in nightreg options select UPDATE TO BETA VERSIONS.....
- 8 install ssaow ... dont edit config files / ini files
- 9. install ssgm edit config files / ini files

make sure u add 01=LuaPlugin.dll under plugins

10. put the stuff in the http://black-cell.net/downloads/index.php?act=view&id=25 file in .. well heres the readme text "Installation:

Unzip LuaPlugin.dll and LuaPlugin.lua into your server folder, the same place where scripts.dll is. Open up ssgm.ini and search for "[Plugins]" WITHOUT a; in front of it.

Add "##=LuaPlugin.dll" after "[Plugins]." Replace ## with the number of the plugin, if you have no plugins installed then it

would be "01." If you have 2 plugins installed then it would be "03," and so on.

Edit LuaPlugin.lua to create your own LUA scripts."

11. add ur code or have some 1 add it or i will when i make my own copy plz and ty. luaplugin.lua can be edited with notepad and same with \*ini files

um add comments / edits to anything i screwed up lol... i have crapppy short term mem ... what was i saying?

## File Attachments 1) luaplugin.lua, downloaded 148 times
