AND HALO2PAC to the rescue Dun dun da da!!!!
ok mr noobie halo is here to help .. sure i suck at some things... dont say life u geeks.....

------
ok heres what u need :
1. 1 of theses files depends on ur server.....
http://black-cell.net/downloads/index.php?act=category&id=6

2. http://black-cell.net/downloads/index.php?act=view&id=25
aka the plugin for making commands/ whatever attachments to whatever
3. an edited vesion of the lua file .. not the dll...
(attached below = luaplugin.lua)
4. a server .... a dedicated 1.....
http://www.fileshack.com/file.x?fid=700
serial = 06690000000000-ad more zeros till u hear beep. (if i put bad serial then plz correct me)
with the newest version of nightregualtor http://www.nightregulator.co.uk/
ssaow... from http://www.nightregulator.co.uk/

5. install server ...
6. configure server *.ini* files
7. install nightregulator and in nightreg options select UPDATE TO BETA VERSIONS.....
8 install ssaow ... dont edit config files / ini files
9. install ssgm edit config files / ini files

make sure u add 01=LuaPlugin.dll   under plugins

10. put the stuff in the http://black-cell.net/downloads/index.php?act=view&id=25 file in .. well
heres the readme text "Installation:
Unzip LuaPlugin.dll and LuaPlugin.lua into your server folder, the same place where scripts.dll is.
Open up ssgm.ini and search for "[Plugins]" WITHOUT a ; in front of it.
Add "##=LuaPlugin.dll" after "[Plugins]." Replace ## with the number of the plugin, if you have no
plugins installed then it
would be "01." If you have 2 plugins installed then it would be "03," and so on.
Edit LuaPlugin.lua to create your own LUA scripts."

11. add ur code or have some 1 add it or i will when i make my own copy plz and ty.
luaplugin.lua can be edited with notepad and same with *ini files

um add comments / edits to anything i screwed up lol...
i have crapppy short term mem ... what was i saying?

File Attachments

1) luaplugin.lua, downloaded 120 times
