Greetings all! It has been a freak'n LOOOOOOOOOONG time since I've visited this community. Been almost about 4-5 years now if feels like, but probably a little shorter... haha.

Anyways, as I was rumbling through some older stuff with Exdeath, he suggested I should post some screenies of a level that I have neglected to finish. Off and on I've been working on it, but I never completed it. Still lacks 2 map areas unfinished and unused (without a purpose atm) and a few models that I haven't been motivated to model either... anyways, here's a few screenies since Exdeath suggested so...

Not that this is a guarantee structure of the leve, but it's suppose to be progressional; you cannot proceed without killing atleast the primary bosses...

Special note: This map isn't for release, but if I ever got off my fat ass, it could be... ;P

Enjoy! ^=^

Slash0x

PS: These were all saved with the "save for web" function, so that should help out.
