I'm sure this error has come up before, i don't want to reinstall Renegade because of disk space, and whenever i reinstall the game it gets messed up somehow with the config., i just wanna know if there is someplace where i can just download this w/o downloading any other junk, i tried downloading the FDS internet and extracting the internet file into the regular internet file for Renegade, but that did'nt work for me, and uh i prob sound like a retard saying that stuff, but that's just cause i suck with computer stuff sides games XD.
