RenGuard has to say the same nick you use online.

For example, mine says
"Welcome to RenGuard, TmtoSlayr!"

This means if I want to play with another name, such as KtchpKngt, I would have to open RenGuard, launch Renegade, and log online with that name. After I've logged in as KtchpKngt, I have to close Renegade and RenGuard, and reopen it. RenGaurd should now say "Welcome to RenGuard, KtchpKngt!" and the RenGuard servers should recognize I'm playing with RenGuard. If not, that's the server's fault, and there is nothing really you can do except complain to the server owner.
