ok here's what i did:

1. Put CD in INSTALLED RENEGADE.
2. Started the game & got prompted to D-L patch 1.037, done.
3.Went to Renguard.com D-L Renguard
4. Started Renegade again, Renguard came up & updated it self to 1.323(or something like that)
5. started Renegade, noticed that at the bottom of the start menu it DIDNT say "BLACK HAND STUDIOS" but rather WESTWOOD patch 1.037

i tried to go to WESTWOOD servers & it kept saying the server is not responding or something like that... and now im here...
