trooprm02 wrote on Sun, 23 September 2007 02:47K, but how can you set your refresh rate lower than 60? Can't be done with most (if any) decent screens.

You can't which is what I said in my first post, however, if you force BF2 to use Vsync, it will only render 60frames since thats what his refresh rate is, thus it wont spike anymore because it will be a constant 60.
