## Subject: one more question
Posted by snipedcha on Mon, 15 Oct 2007 18:54:53 GMT

i posted a problem last night concerning not being able to get renegade/renguard to work. I reinstalled it following the installaiton guide on the site and have run into another problem.Whenever i try and start renegade, i get through renguard but it tells me there was an error loading the bhs.dll and i should repor this error.

any suggestions?
